

EWE

Environmental Waste Equipment

Fully Auto-Tie Horizontal Balers

EWE offer an extensive range with over 24 standard models ranging from our entry level 50 tonne pressure machine which can process up to 5 tonnes per hour to our largest twin 75hp motor baler generating 200+ tonnes of pressure and will process in excess of 29 tonnes per hour. These machines can provide dense bales weighing 850kg+. These balers are suitable for a variety of different products including paper, cardboard, plastic and non-ferrous metals, making it ideal for recycling. Feed options include conveyor, air systems and loading shovel. Applications include distribution centres, Material Recovery Facilities, Transfer Stations, recyclers and waste managers.

For full details please contact our Technical Department

Features and Benefits

- Allen Bradley PLC Controls
- Maestro colour touch screen with computer diagnostics
- Patented single tension cylinder chamber
- Pressure & current transducers
- Hot oil temps & low oil sensor 7 shutdowns
- 5 tie auto tier
- Photo cells
- Electrical disconnect
- Quiet efficient pumps
- Infrared
- Digital bale length counter
- Abrasion resistant floor and ram bottom
- Hopper chute with view door
- Efficient TEFC power unit with Regen circuit
- Air-to-oil cooler
- Bale table
- Spring retainer locks

- Start up alarms/beacons
- modem
- Reversible/replaceable sheer blades
- Ceramic wire guides
- Nylatron liners
